## Business Philosophy

Reputation Oriented, Win-Win Co-existence, Technology Innovation & Quality First.

## About Us

**THAKUR STEEL** Co., Ltd is a group company with more than 10 years history in stainless steel field. Thakur Steel integrated the whole industry chain with own factories provide the customers one stop solutions for all kinds of decorative stainless steel sheet.

With more than 10 years of growth, Sanseng Stainless have vacuum coating equipment, electroplating equipment, water plating equipment, and blasting equipment, etching equipment, embossing equipment polishing equipment and can produce and match big projects from architectural interior decorative products to outdoor stainless steel decoration application, also widely used for elevator decoration applications, household appliances, bathroom decoration, showcase, ceiling and cabinets and furniture etc.

## .... Stainless Steel Decoration Sheet

In the tides of ever newer contemporary decoration art, the traditional decoration materials and relevant aesthetic concepts are spurned one after another, while new materials, new techniques and new concepts are booming ceaselessly

Stainless Steel as an independent decoration materials, which helps expand designers' creating approaches and personalized design language for stainless steel surface treatment, stainless steel decoration plate, frosting, etching, embossing, hairline, 8K, colored, etc.

Decoration Sheet

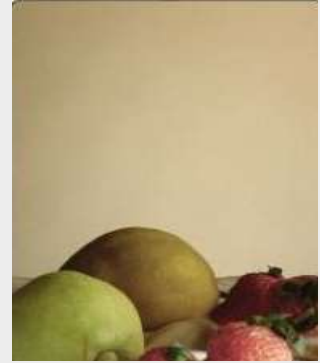

Mirror Surface Finished

# Mirror Surface Sheet

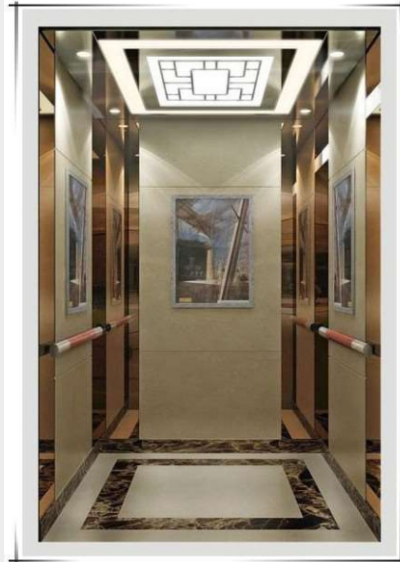

THAKUR STEEL widely provide 6K Mirror, 8K Mirror, 8K Plus Mirror and 10K Mirror Finish quality stainless steel sheet with different cost for customer selection.

Mirror finish sheet can have different color such as Gold, rose gold, black, bronze or copper etc. We can process different designs on the mirror sheet for choice by etched or embossing etc.

Most of the architects, designers and DIY-ers love using 8K Mirror Finish Stainless, which has every quality of stainless - durability, cut-ability - with the beauty of a near flawless mirrored surface. #8K Mirror Finish Stainless will not crack, corrode, rust, tarnish, peel or discolor, holding up to indoor and outdoor elements ranging from humidity, cold, salt, soap, rain and sun. #6K Mirror finish is widely used for embossed stainless steel sheet as the first process to make the embossed sheet more luster and shining.

Hairline Surface Finished

....

## Hairline Surface Sheet

Hairline stainless steel sheet also called brushed stainless steel sheet, there are two types hairline technology are widely used: Dry Hairline and Oil Hairline.

Dry Hairline: Low cost and widely used for common decoration.

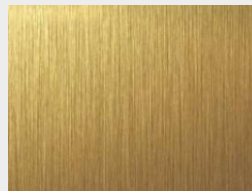

Oil Hairline: When processing the hairline finish will add metal emulsion and make the hairline finish more luster and shine. Cost is higher than common decoration and quality better.

## Etched

....

## Etched

There are two technologies for etched stainless steel sheet, one is silk screen etching and the other is photosensitive etching; Photosensitive etching has not serrated edge and can produce complicated design. Photosensitive etching is better quality but price is much higher also.

As the etching is chemical reaction with stainless steel sheet so the depth of etch will influence the cost a lot.

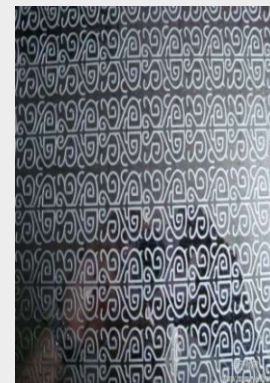

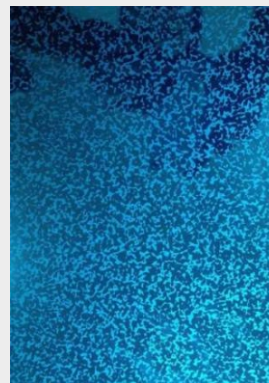

Light Surface etched and 3C/5C depth etchings are popular used, Sanseng Stainless will recommend the right products of different application of stainless steel sheet and purchase budget according to customers need.
